

**Multicrop**

**EcoAnt<sup>®</sup>**

## Natural Insect Spray

- ✓ Eco-Friendly
- ✓ Kills and repels ants, earwigs & slaters on contact
- ✓ Contains natural botanical extracts
- ✓ Does not contain chlorpyrifos, permethrin, Endosulfan or other chemical poisons.
- ✓ EcoAnt is not a scheduled poison
- ✓ Available in a 1L ready-to-use trigger pack

Multicrop EcoAnt Insect Spray is based on a combination of natural Pyrethrins and Eucalyptus oil. The pyrethrum is extracted from the flower of the Pyrethrum daisy. It is a potent, broad spectrum, contact insect killer that attacks the nervous system of insects. To humans though, Pyrethrum is safe and non toxic because it does not attack mammals and breaks down very quickly. Eucalyptus is also known to contain insecticidal activity as well as being a strong repellent. Eucalyptus also tends to remain on or in the plants longer than Pyrethrum.

### Benefits:

- ✓ A fast acting, contact insecticide.
- ✓ No harmful residues left.
- ✓ Kills Ants, Earwigs, Slaters and Leafhoppers.
- ✓ Minimal waste, apply when insects are active.
- ✓ Flushes insects out from hiding places.
- ✓ Many years proven safety to humans and animals.
- ✓ Only one day withholding Period.

**Active constituents:** 0.3g/L Pyrethrins, 1.2g/L Piperonyl Butoxide and 10g/L Eucalyptus Oil
